## **AMERICAN CIVIL CONSTRUCTORS RECIEVES THE 2007 CONTRACTOR OF THE YEAR AWARD AT ANNUAL CCASLA BANQUET**

The Colorado Chapter of the American Society of Landscape Architects recently honored American Civil Constructors with the prestigious Contractor of the Year Award for 2007. The award was presented to ACC on October 19<sup>th</sup> in Estes Park, Colorado. The award has been given annually since 1987 and this is the second time ACC has been honored.

The Contractor of the Year award is presented to a company “which provides quality support and implementation for our design efforts and best meets the qualifications set forth for the award.” In order for a firm to qualify they must be a member of the Associated Landscape Contractors of Colorado and have to be nominated by a member of ASLA. The qualifications necessary to win the award include; a demonstrated skill/project management/service to the industry, a commitment to quality and support of landscape architecture and CCASLA, a cooperation of their *total organization* on a continuing basis, a performance level above the expected norm and professionalism, a quality of executed works or products and bringing value to projects, and other specifics which distinguish the nominee in an exemplary manner.

This year, the Architerra Group nominated ACC and specified in the nomination letter, “Their support of CCASLA and landscape architecture was evident as senior members of ACC were instrumental in the passage of the licensure bill.” Other attributes cited that earned ACC the coveted title included, “ They often go beyond the call of duty when implementing projects. Their exceptional project management has led to numerous projects being completed ahead of schedule.” and “As industry leaders in the synthetic turf arena, ACC brings value to ball field projects with their knowledge of different products, installation methods, base materials, etc.”

American Civil Constructors has more than four decades of experience in the construction and maintenance business. Performing work in the landscape, civil, and sports industries, they have been committed to building a reputation for exceptional service and a commitment to client satisfaction.
